Special Issue **"Feature Paper on Computer and Electrical Engineering 2022"**

Deadline for manuscript submissions: **30 September 2022**

Special Issue Editor

Name: Prof. Dr. Chengwen Luo

Affiliation: College of Computer Science and Software Engineering, Shenzhen University, 518060 Shenzhen, China

E-Mail: chengwen@szu.edu.cn

Website:

<https://scholar.google.com/citations?user=DPW5Pj8AAAAJ&hl=zh-CN>

Research Interests: Internet of Things; Mobile Computing; Network Security

Special Issue Information

Dear Colleagues,

Computer engineering programs were largely developed in engineering departments with a focus on electrical engineering. Today, the influence of computers has become more revolutionary than that of electrical engineering. The design, analysis, and operation of electrical and electronic systems are now dominated by computers, driven by a natural and convenient interface between computers and electrical systems, as well as significant improvements in speed and efficiency.

The aim of this Special Issue is publish outstanding papers presenting the latest research and results of scientists related to Computer and Electrical Engineering topics.

This Special Issue also contributes as a part of selected papers from 2022 The 15th International Conference on Computer and Electrical Engineering (ICCEE 2022). The conference will be held in and sponsored by Shenzhen University, China, on 24–26 June 2022 (<http://www.iccee.org/>).

ICCEE was started in Phuket Island, Thailand in the year 2008, and after the success of the first edition, it has been held annually in Dubai (UAE), Chengdu (China), Singapore, Hong
